Musician, Songwriter and Performer has recorded a variety of CD's including **CHILL, Whales with Guitars, and Singles that provide a relaxation atmosphere for you to relax or sleep.** In addition, providers and their clients can choose some music written for a positive counseling experience. Symptoms often can be managed through music in combination of medicine and psychotherapy.

Specific situations may call for a specific kind of music.

For example, listening to classical music with a tempo of 60 beats per minute can help a client relax or reduce anxiety. Listening to music at a faster pace may be beneficial to clients who have to deal with motivational issues such as fatigue and depression.

A price list is available upon request. Just send an e-mail [melickmusic@gmail.com](mailto:melickmusic@gmail.com) or fill out the contact form on my website.
